FINAL MEETING AND PROJECT CLOSING CONFERENCE

SERIO final conference was held on February 24th 2016 in Warsaw. The conference took place on Warsaw University of Technology – Civil Engineering Faculty.

Attended by 57 participants from technical schools of construction, universities of technology, European partners, the conference featured many topics specific to European Union region, such as addressing problems and challenges associated with Health and Safety in construction sector.

The aim of this conference was to identify the most popular risks related with working on the site and most efficient preventions in this area.

The conference programme included four presentations:

- Introduction to SERIO project and SERIO application presentation – Maciej Siemiątkowski PZPB
- New technologies in health and safety trainings – Altan Dizdar ERBIL
- Building Information Modeling and Augmented Reality as a tools for improving the safety of construction works - Krzysztof Kaczorek University of Technology – Civil Engineering Faculty
- H&S management on site - François Adoue MPS

Participants were provided with beta version of SERIO application. The final version of SERIO will be available on project website www.serio.mobi and on google play.

PROJECT BACKGROUND

Across Europe the construction industry is one of the largest sectors in each country's economy, providing significant employment with an annual turnover exceeding EUR 900 billion. The nature of the industry remains hazardous; more than a thousand workers are killed annually and over 800,000 workers are injured, often seriously.

Short movie presenting SERIO application is available on the project website: <http://serio.mobi/downloads/>

PROJECT AIMS

The SERIO project addressed the following objectives:

- the creation of an application allowing quick and easy understanding of H&S issues
- the creation of a training methodology adapted for the application including e.g. pictures, voices, animations and short movies
- the improvement of H&S practice on building sites across Europe
- the enhanced mobility of the labor force in the European Union.
